Precipitation (inches)

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

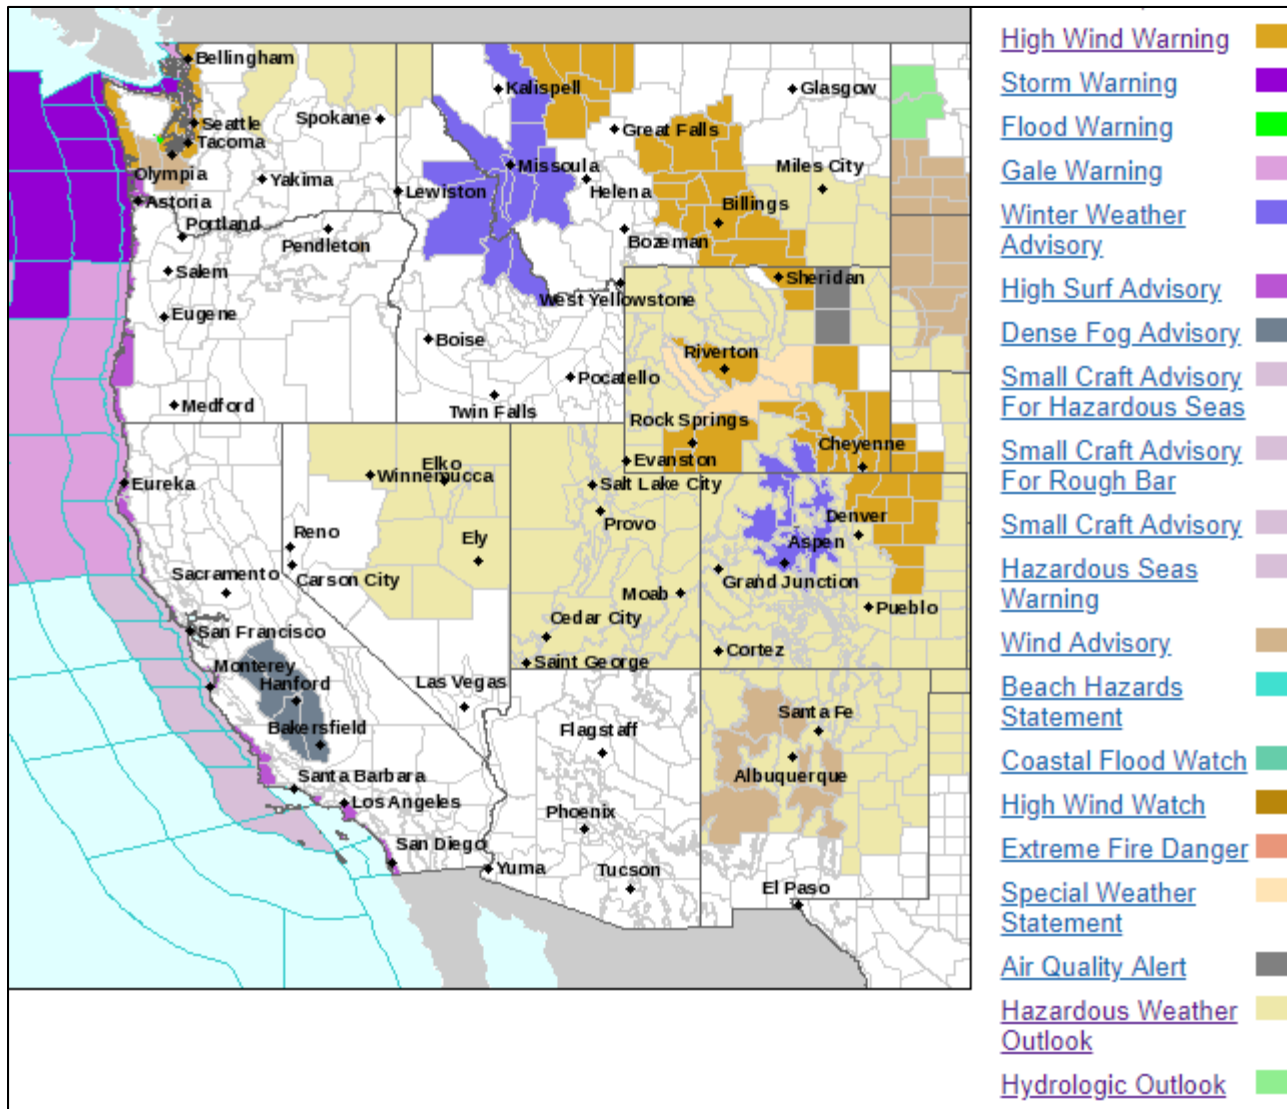

- A series of Pacific low pressure troughs and cold fronts will continue the wet unsettled weather in the region for the next week and beyond.
- A small-scale high pressure ridge passing overhead today will produce fair and dry weather today with areas of NW-NE winds gusting to 20-25 mph or so.
- The next system will reach the north coast Thursday morning with rain and snow levels above 5,000 feet. Snow levels will come down to 4,000 feet in the north and 6,000 feet in the south as the system moves through the region Thursday and Thursday night. SE-SW winds will gust to 35-45 mph on Thursday.
- Multiple waves of wet weather are expected Saturday evening through midday Tuesday, with fairly light precipitation until midday Monday, then precipitation turning heavy. Snow levels start out around 5,000-7,000 feet, but drop to 3,000-5,000 feet Monday. Gusty southerly winds are expected again.
- Another brief system will produce light precipitation Wednesday, with snow levels 2,500-4,000 feet.
- After next Wednesday dry weather with occasionally gusty N-NE winds is now forecast for the next week or more.

SOUTHERN CALIFORNIA

- Strong high pressure will sit over California through Thursday. A series of Pacific troughs will move into the West Coast Friday through the middle of next week. Each trough will be stronger than the previous one.
- Temperatures will be around 10 degrees above normal through Thursday, with mid 50s to mid 60s across the mountains and upper 60s and 70s in the valleys.
- Minimum humidity will be mainly in the single digits and teens through Thursday.
- Significant cooling along with an increase in humidity will take place Friday through the middle next week.
- Southwest to west winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert areas Friday morning through Saturday morning.
- Showers with light rainfall amounts and low snow levels will move across the area early next week.
- Heavier precipitation amounts are likely toward the middle to end of next week
- There will be very strong westerly winds across the wind prone mountains and deserts next week.
